skills

Vue.js	Node.js	gRPC
JavaScript	GoLang	Docker
TypeScript	PostgreSQL	Git / GitHub
HTML / SCSS	MongoDB	Vue CLI / Webpack

project

Web Application - { Vue, Node, Golang, gRPC, Postgres, Microservice, Docker, Scrum }

Humpback Whale Social Call

JAN 2018 - JUN 2019

- Application for consolidating and tracking data about humpback whales used by biologists. This project won a grant from Microsoft Azure for 1 year of free resources

- Full stack developer, working on both front and back end with 5 other members

- Designed user service API contract using gRPC

- Implemented and maintained user service using GoLang

- Performed unit testing to ensure good code coverage

- Deployed and shipped user service using Docker container

- Performed code reviews to ensure code quality

- Designed and prototyped the user graphical interface (website) using AdobeXD

- Configured frontend and connected backend gateway using Envoy Proxy and grpcWeb

professional

Web Developer Intern - { Vue, CSS, JS, jQuery, Bootstrap, REST API, Java, Spring }

Portfolio Mason, Seattle, WA

MAR 2018 - AUG 2018

- Configured and integrated Vue framework into an existing Java application for a web page that emulated a single page application

- Improved user interaction experience by redesigning and restructuring existing web pages

- Tested web pages for responsiveness and bugs with mobile phone and different browsers

education

University of Washington

B.S. Computer Science & Software Engineering

SEP 2016 - JUN 2018
Cum Laude Honors - GPA 3.76
